Summary

AI engineer building production RAG pipelines, multi-agent systems, and real-time voice agents in Python. Currently at Droisys, developing a recruiting platform that combines hybrid search over 5,000+ resumes, an agentic workflow layer, and an AI phone interviewer.

Skills

- **Programming:** Python, C/C++
- **CS Fundamentals:** Data Structures & Algorithms, Object Oriented Programming
- **AI:** RAG, LLMs, AI Agents, Multi-Agent Systems, Embeddings, Ollama, MCP
- **Retrieval & Evaluation:** Hybrid Retrieval (HNSW, BM25, RRF), RAGAS
- **Frameworks & Backend:** Google ADK, LangChain, LangGraph, Pipecat, FastAPI, Flask, REST APIs, Pydantic
- **Cloud & DevOps:** GCP (Cloud Run), AWS (EC2, S3, IAM), Docker
- **Data & Vector DBs:** OpenSearch, FAISS, ChromaDB, Pinecone, pgvector, SQL, NoSQL
- **Developer Tools:** Git, GitHub, Bitbucket, Jira, Postman, VS Code, GitHub Copilot, Cursor, Claude Code, Codex, OpenCode, Antigravity

Experience

Droisys

AIML Trainee

AIML Intern

Noida, India

Sep 2026 – Present

Jun 2026 – Sep 2026

Building Recruiter AI, an in-house platform that automates candidate sourcing, interviewing, outreach, and resume processing.

- Built an agentic layer on **Google ADK** that lets recruiters create job descriptions, search candidates, and send outreach emails through natural-language prompts, automating an est. ~**80%** of previously manual recruiting tasks.
- Developed a real-time **AI voice interviewer** that has conducted **50+ phone interviews** end to end: Twilio telephony, STT/TTS, and voice activity detection streamed through **Pipecat** on a **FastAPI** backend, with **Google Gemini** driving the conversation.
- Built a **hybrid dense-sparse retrieval pipeline** on **OpenSearch**, fusing HNSW vector search with keyword retrieval via Reciprocal Rank Fusion, powering semantic candidate search across **5,000+ resumes**.
- Automated conversion of incoming resumes into the company-standard template, eliminating manual reformatting for recruiters.

Technical Projects

Archon: AI Knowledge Assistant

Python, Gemini 2.5 Flash, LangChain, FAISS, BM25

GitHub

- Built a RAG assistant for natural-language Q&A over **1,000+ technical documents**, with answers grounded in retrieved chunks using **Gemini 2.5 Flash**.
- Designed hybrid retrieval combining **FAISS** dense search with **BM25** keyword search, improving relevance on both exact-term and semantic queries.
- Built an ingestion pipeline that chunks, embeds, and indexes the document corpus into both FAISS and BM25 indexes, so every query searches the full corpus in one step.

Education

GL Bajaj Institute of Technology and Management

B.Tech (Artificial Intelligence & Machine Learning)

Greater Noida, UP

Oct 2023 – 2027 (Expected)

Certifications

AWS Cloud Foundations

Udemy AI Engineer Core Track: **LLM Engineering, RAG, QLoRA, Agents**
